Climate Initiative

Lesson 4: The Greenhouse Effect

Phenology

What might cause a shift in phenology?

Phenology

What might cause a shift in phenology?

Climate change

Climate Change: The Big Picture

The entire earth is warming

Everything on our earth is connected: a change in one place causes more changes in other places

The Carbon Cycle

The air we breathe

The Carbon Cycle

All life is made of Carbon

The Carbon Cycle

This life decomposes, and
the Carbon returns to the earth.

The Carbon Cycle

The air we breathe

The Carbon Cycle

Lesson 4: The Greenhouse Effect

Weather or Climate?

Climate

The overall weather pattern
of an area over a long period
of time:

Climate

The overall weather pattern of an area over a long period of time:

- General Temperature
- General rainfall
- General Wind
- General Humidity

Weather

Weather

Local and temporary specific EVENT:

- Rain
- Snow
- Wind

Climate or Weather?

A tornado hits Verona, Wisconsin

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate

It rains more in Wisconsin than in Texas.

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate

It rains more in Wisconsin than in Texas.

Climate

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate

It rains more in Wisconsin than in Texas.

Climate

Last week, 4 inches of snow fell in
Madison, Wisconsin.

Climate or Weather?

A tornado hits Verona, Wisconsin

Weather

Chicago, Illinois is usually a windy city

Climate

It rains more in Wisconsin than in Texas.

Climate

Last week, 4 inches of snow fell in Madison, Wisconsin.

Weather

What does a greenhouse do?

What does a greenhouse do?

Now, the Earth

Atmosphere

Made up of **gasses** that act like a **greenhouse**,
keeping the earth warm

The Greenhouse Effect

Greenhouse effect is usually a good thing.

It keeps our earth warm

The Carbon Cycle

The Earth's Climate is Changing

Because of Human Activity

More **greenhouse gasses** into the **atmosphere**
Increasing the **greenhouse effect**.

The Earth's Climate is Changing

Because of Human Activity

More greenhouse gasses into the atmosphere
Increasing the greenhouse effect.

Greenhouse gasses: trap heat in our
atmosphere and make the earth warmer

The Earth's Climate is Changing

Because of Human Activity

More
greenhouse
gasses
into the
atmosphere

The Earth's Climate is Changing

Because of Human Activity

More
greenhouse
gasses
into the
atmosphere

The Earth's Climate is Changing

Because of Human Activity

Another example: like a car in the sun.

Windows down =
heat escapes

Windows up =
heat trapped

The Earth's Climate is Changing

1.6 °F
Warmer
in
150 years

How can you help?

Reduce your fossil fuel use!

Bike or take the bus

Turn down the heat

Take short showers
